

## ShipRite Web Service Capabilities

Our technology enables you to display shipment pricing using your negotiated rates directly from your own website.

Using product and shipping origin data already stored on your system it's a simple matter to capture the customer's delivery zip code and pass the information to ShipRite for a fast, accurate list of available carriers.

When the data returns, choose a carrier, apply a mark-up and display to your customer. It's that easy.

### ShipRite Requests & Responses

Data sent to ShipRite by your service	Data returned from ShipRite
<ul style="list-style-type: none"> <li>• Origin zip code</li> <li>• Destination zip code</li> <li>• Accessorials</li> <li>• Class</li> <li>• Cubic feet</li> <li>• Number of packages</li> <li>• Number of pallets</li> <li>• Ship date</li> <li>• Unit type (Imperial or metric)</li> <li>• Weight</li> </ul>	<ul style="list-style-type: none"> <li>• Carriers</li> <li>• Direct/Interline</li> <li>• Estimated days / delivery date</li> <li>• Type (LTL, TL, Small package)</li> <li>• Net Charge</li> <li>• Fuel Surcharge</li> <li>• Extra charges (accessorials)</li> <li>• Final charge</li> </ul>
